# **Thailand's Full Service Airline - Bangkok Airways**

Over the last few decades, Thailand has become an increasingly popular destination, and Bangkok Airways is one of the major airlines that serves the transportation needs of travelers to this country. Anyone traveling to various spots within Thailand, or to neighboring Asian countries will find that this airline provides top quality service that makes it easy to reach your destination in comfort. The following are some facts about Bangkok Airways that may interest you if you're planning a trip to this area.

Bangkok Airways has built three airports of its own, and these all reflect the airline's policy of creating a uniquely modern and comfortable atmosphere for passengers. Unlike many airports, which are often uninteresting clones of one another, this airline has designed three distinct airports, each made to blend in well with its surroundings. Samui Airport, for example, has open-air, thatched buildings that harmonize with the tropical climate. The architecture and design of these airports are made with the environment in mind, so you don't feel like you're in a generic airport. Combined with the comfort and style of the lounges, this makes your trip to Thailand more pleasant as well as authentic feeling.

The number of flights Bangkok Airways offers, not only within Thailand, but to other Asian countries makes it easy to plan multi destination trips. Aside from offering flights to nearby countries like Cambodia and Laos, the airline also flies to places like Hong Kong, Bangladesh and India, so they cover quite a bit of the Asian continent. Many international travelers, whether flying for business or pleasure, want to visit more than one location in Asia, and with Bangkok Airways you can easily plan an itinerary to meet your needs. When you combine this with the many flights you can find from one city in Thailand to another, it gives you lots of options for any trips you may be making to this area.

There's now a way to fly economically all around Thailand, with the Discovery Airpass, a new program offered by Bangkok Airways. If you want to visit several locations within this fascinating and diverse country, there are many options, including buses, trains, rental cars and, in some areas, boats. However, air travel is often the quickest and most convenient way to get somewhere, but it's not always affordable to travel everywhere by plane. Yet Discovery Airpass gives you affordable access to many destinations. You can take popular routes such as Bangkok to Maldives, Samui or Luang Prabang in Laos. If you have limited time, it's very convenient to be able to affordably hop on a plane and get to your next destination quickly and comfortably.

Bangkok Airways, then, is a convenient solution for travelers who are visiting Thailand for any purpose. This airline has gotten quite a bit of attention recently for its uniquely designed airports and lounges, increased services to more countries and its acquisition of modern aircrafts. These are some of the features that are causing more travelers to Asia take a close look at Bangkok Airways when they book their flights.
